PRO WALL-HANGED FAUCET

The wall-mounted tap from the PRO series is ideal for all public spaces where access to drinking water is needed. Comes with a standard handle.

Its design allows it to blend naturally with any facade.

Made from solid stainless steel and hand-assembled in Denmark, ensuring a frost-free solution that lasts year after year.

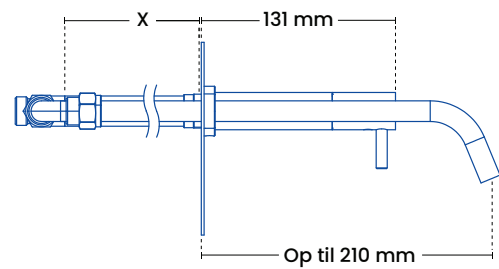

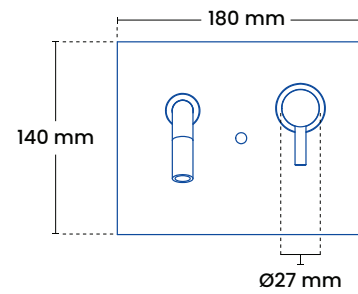

PRO WALL-HANGED FAUCET

Frostline is manufactured in Denmark and has over 30 years of experience. We offer a wide range of frost-free outdoor products with beautiful design, high quality, and great functionality. The tap operates with a self-draining mechanical valve that empties the product of water after use, allowing you to shower year-round. Our products do not require electricity to remain frost-free and are made of stainless steel, making them environmentally friendly in every way.

Important!

For proper functionality, it is essential that the pipe running through the wall slopes 2-3 per mille towards the facade. This ensures that the fixture can drain completely.

Glassblown
